PHYSICS LETTERS B

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/INSPEC

Volume 441, numbers 1,2,3,4 **26 November 1998**

Contents

Instructions to authors v

Nuclei

Polarization observables in electronuclear two-nucleon knockout
J. Ryckebusch, W. Van Nespen and D. Debruyne 1

Kaon condensation at finite temperature
T. Tatsumi and M. Yasuhira 9

Production of $e^+ e^-$ pairs in proton-deuteron capture to ^{3}He
A.Yu. Korchin, D. Van Neck, M. Waroquier, O. Scholten and A.E.L. Dieperink 17

The neutron charge form factor in helium-3
D.H. Lu, K. Tsushima, A.W. Thomas, A.G. Williams and K. Saito 27

Particles and fields

Quantum collapse and the birth of a new universe
M.L. Fil'chenkov 34

Can the type-IIB axion prevent Pre-Big Bang inflation?
A. Feinstein and M.A. Vázquez-Mozo 40

Atmospheric neutrino anomaly and supersymmetric inflation
G. Lazarides and N.D. Vlachos 46

Global versus local cosmic strings from pseudo-anomalous U(1)
P. Binétruy, C. Deffayet and P. Peter 52

Classical Teichmüller theory and (2 + 1) gravity
R. Benedetti and E. Guadagnini 60

Comments on the non-commutative description of classical gravity
G. Bimonte, R. Musto, A. Stern and P. Vitale 69

Gravitating dyons and dyonic black holes
Y. Brihaye, B. Hartmann and J. Kunz 77

Probing the BTZ black hole with test fields
H.W. Lee, N.J. Kim and Y.S. Myung 83

Entropy of extremal black holes in asymptotically anti-de Sitter spacetime
P. Mitra 89

Black holes and sub-millimeter dimensions
P.C. Argyres, S. Dimopoulos and J. March-Russell 96

The spacetime superalgebras in a massive IIA background via brane probes
T. Sato 105

The background geometry of DLCQ supergravity
S. Hyun 116

More on the similarity between $D = 5$ simple supergravity and M theory
S. Mizoguchi and N. Ohta 123

Stable non-BPS D-particles
O. Bergman and M.R. Gaberdiel 133

Completeness of boundary conditions for the critical three-state Potts model
J. Fuchs and C. Schweigert 141

***T*-duality in lattice regularized σ-models**
S. Jaimungal 147

Seiberg-Witten theory as $d < 1$ topological strings
K. Ito, C.-S. Xiong and S.-K. Yang 155

Pseudo-anomalous $U(1)$ symmetry in the strong coupling limit of the heterotic string
P. Binétruy, C. Deffayet, E. Dudas and P. Ramond 163

Antisymmetric tensor field on AdS_5
G.E. Arutyunov and S.A. Frolov 173

0370-2693(19981126)441:1-4;1-J

PHYSICS LETTERS B

Volume 441, numbers 1,2,3,4 26 November 1998

Contents

(Continued from page 4 of cover)

α_s and gauge coupling unification in flipped SU(5) models with gauge-mediated supersymmetry breaking
K.T. Mahanthappa and S. Oh 178

Uniqueness of Bogomol'nyi equations and Born-Infeld like supersymmetric theories
H.R. Christiansen, C. Núñez and F.A. Schaposnik 185

Models of supersymmetric $U(2) \times U(1)$ flavor symmetry
G. Eyal 191

Couplings between generalized gauge fields
J.A. Garcia and B. Knaepen 198

The Higgs boson mass as a probe of the minimal supersymmetric standard model
M. Carena, P.H. Chankowski, S. Pokorski and C.E.M. Wagner 205

Higgs particle production at e^+e^--colliders and the RG-improved nonlinear supersymmetric standard model
S.W. Ham, B.R. Kim, G. Kreyerhoff and S.K. Oh 215

Tau lepton mixing with charginos and its effects on chargino searches at e^+e^- colliders
A.G. Akeroyd, M.A. Díaz and J.W.F. Valle 224

Infrared behaviour of softly broken SQCD and its dual
A. Karch, T. Kobayashi, J. Kubo and G. Zoupanos 235

Open groups of constraints. Integrating arbitrary involutions
I. Batalin and R. Marnelius 243

On forms with non-Abelian charges and their dualities
L. Baulieu 250

Non-trivial behaviour of the scattering amplitude of contact-interacting anyons
P. Giacconi, F. Maltoni and R. Soldati 257

Energy of the vacuum with a perfectly conducting and infinite cylindrical surface
P. Gosdzinsky and A. Romeo 265

Magnetic monopole solutions with a massive dilaton
P. Forgács and J. Gyürüsi 275

Boson-boson stars and their gravitational redshifts
C. Deng and C.-G. Huang 285

Helioseismology can test the Maxwell-Boltzmann distribution
S. Degl'Innocenti, G. Fiorentini, M. Lissia, P. Quarati and B. Ricci 291

Gauge model for maximal neutrino mixing
R.N. Mohapatra and S. Nussinov 299

Solar antineutrinos from fluctuating magnetic fields at Kamiokande
E. Torrente-Lujan 305

One-loop finite temperature effective potential in QED in the worldline approach
I.A. Shovkovy 313

Ehrenfest theorems and charge antiscreening in Abelian projected gauge theories
G. Di Cecio, A. Hart and R.W. Haymaker 319

Finite Size Scaling and "perfect" actions: the three dimensional Ising model
H.G. Ballesteros, L.A. Fernández, V. Martín-Mayor and A. Muñoz Sudupe 330

Non-trivial critical exponents for finite temperature chiral transitions at fixed total fermion number
F.S. Nogueira, M.B. Silva Neto and N.F. Svaiter 339

(Continued on preceding page)

PHYSICS LETTERS B

Volume 441, numbers 1,2,3,4 26 November 1998

Contents

(Continued from following page)

Compact analytical form for non-zeta terms in critical exponents at order $1/N^3$
D.J. Broadhurst and A.V. Kotikov 345

The strength of the electroweak phase transition at $m_H \approx$ 80 GeV
F. Csikor, Z. Fodor and J. Heitger 354

Decays of $\ell = 1$ baryons to $\Delta\gamma$
C.E. Carlson and C.D. Carone 363

Model independent determination of the light-cone wave functions for exclusive processes
U. Aglietti, M. Ciuchini, G. Corbò, E. Franco, G. Martinelli and L. Silvestrini 371

A light leptophobic Z' in polarized hadronic collisions
P. Taxil and J.-M. Virey 376

Higgs radiation off top quarks in e^+e^- collisions
S. Dittmaier, M. Krämer, Y. Liao, M. Spira and P.M. Zerwas 383

The Higgs boson mass and Ward-Takahashi identity in gauged Nambu-Jona-Lasinio model
M. Hashimoto 389

Heavy quark distribution function in QCD and nonperturbative parameters in heavy quark expansion
H.-W. Huang 396

New bound on γ from $B^{\pm} \to \pi K$ decays
M. Neubert and J.L. Rosner 403

Exclusive $B \to M\ell^+\ell^-$ ($M = \pi, K, \rho, K^*$) decays and determinations of $|V_{ts}|$ (and $|V_{td}/V_{ts}|$)
T.M. Aliev, C.S. Kim and M. Savcı 410

On the invisible decays of the Υ and J/Ψ resonances
L.N. Chang, O. Lebedev and J.N. Ng 419

J/Ψ suppression and the quark-gluon plasma
S. Frankel and W. Frati 425

A model of interacting partons for hadronic structure functions
G.S. Krishnaswami and S.G. Rajeev 429

Double chiral logs
J. Bijnens, G. Colangelo and G. Ecker 437

Resonant states in ^3P channels of Charmonium
E. Di Salvo, M. Pallavicini and E. Robutti 447

Hard π^0 and η production in $S + Au$ nuclear collisions at SPS energies and possible signature of quark-gluon plasma
Yu.A. Tarasov 453

The quark spin distributions of the nucleon
B.-Q. Ma, I. Schmidt and J. Soffer 461

Resonant bound state production at e^-e^- colliders
D. Bowser-Chao, T.D. Imbo, B.A. King and E.C. Martell 468

Bunching parameters and correlators in 400 GeV/c pp collisions
S. Wang, R. Liu and Z. Wang 473

A search for η_c' production in photon–photon fusion at LEP
DELPHI Collaboration 479

Author index to volume 441 491
